Sustainable Biomass Policy – Woodville Pellets

Woodville Pellets is a subsidiary of [Graanul Invest](#). Graanul Invest Group, a world leading sustainable biomass and bioenergy producer. For over 20 years, we have dedicated ourselves to developing and re-inventing the bioenergy sector.

Woodville Pellets sustainability approach is supported the [Graanul Invest Group Sustainability-Linked Financing Framework](#), which recognizes that wood pellets are a renewable heating material that can replace gas, oil, coal or oil shale. Wood pellets are an environmentally friendly biofuel sourced from the production residues of the wood industries and low-quality roundwood that is not suitable for producing sawn timber and other wood products. Replacing fossil fuels with bioenergy like wood pellets is an important step in addressing climate challenges.

As part of this strategy, Woodville Pellets is dedicated to achieving and maintaining certification to the Sustainable Biomass Program (SBP) and Programme for Endorsement of Forest Certification (PEFC/29-31-491) chain of custody standards.

Woodville Pellets rigorously complies with applicable US international, federal, state, and local environmental, social, and health and safety laws and regulations. This includes compliance with the applicable European Union (EU) market requirements including the due diligence and mass balancing of feedstock and wood pellets in compliance with the Renewable Energy Directive III (RED III) and the EU Deforestation Regulation (EUDR).

Woodville Pellets annually reviews the effectiveness of its Sustainable Biomass Policy, chain of custody and responsible sourcing programs to continually improve its wood procurement systems and fiber supply plan and to ensure legal and regulatory compliance.
